Re: Verizon Wireless Service to the Irish Settlement at 2150 Dryden Road, Dryden, NY

Taitem Engineering services were retained to review the application/documentation for the new proposed a wireless communications facility.

- The facility is currently being proposed at the mentioned above address.
- Taitem received all pertinent documentation by Nixon Peabody.
- The scope of review was focused on the following;
 - 1) Exhibit B – Radio frequency and network design analysis, including propagation.
 - 2) Exhibit C – Site selection analysis.
 - 3) Exhibit H – FAA Report.
 - 4) Exhibit I – FCC license.
 - 5) Exhibit L – EME study certifying compliance with FCC regulations.

We performed a review of the documents listed above for compliance with the Town of Dryden Local Law #2 (2006) and applicable standards and codes.

In our professional opinion the documentation provided for the new proposed wireless communication facility is compliance with local laws, codes and standards.

Feel free to give me a call or e-mail if you have any questions.

Javier E. Rosa, PE
Partner - Senior Engineer
