PRESS RELEASE

March 31, 2017

Next Town Board Meeting on solar projects postponed

On March 16th the Town Board opened a public hearing to hear public comment on and review the application of SUN8 PDC, LLC (c/o Distributed Sun, LLC) for community solar projects at 2150 Dryden, Stevenson, Dodge and Turkey Hill Roads. This Special Use Permit application is for the installation of 29 MW of large-scale community solar energy systems distributed across the four locations listed above. A number of concerns and issues were raised at that meeting and a continuation of that public hearing was tentatively scheduled for April 6th. That meeting is now canceled.

The Town requested some additional application materials that have not yet been received. To allow the Town, public and others adequate time to review these materials the meeting is postponed to a future date. At that time the project's environmental impacts will be reviewed under the State Environmental Quality Review Act (SEQRA). Subsequent meetings will be held by both the Planning Board and Town Board to review the site plan and other aspects of the Special Use Permit application. New materials will be posted to the town's website as they become available and notice will be sent out when a new hearing date is set.
