Re: Mineah Road and Route 13

Dear Ms. Parmley:

The Mineah Road intersection is one of the many intersections along the busy Route 13 corridor in Dryden that present a hazard to those trying to enter or exit Route 13. Unlike many other roads entering the corridor, Mineah Road is a dead end and users can't reroute to try an alternate intersection. This leaves some residents feeling trapped at times. It would help if we could find a way to make this intersection safer for users. To that end, I request that an intersection study be done to find potential solutions.

As with all of the roads intersecting Route 13, the potential for more residences to be built along Mineah Road should also be taken into account. I would be happy to participate in any scoping required for that study.

I hope that we can pull together some information on the Mineah Road intersection and possible options to improve the safety of this intersection. I look forward to your reply or call at 607-844-8888 ext 213.

Sincerely,

Ray Burger
Planning Director
