## Instructions for Completing

**Part 1 - Project Information.** The applicant or project sponsor is responsible for the completion of Part 1. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification. Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information.

Complete all items in Part 1. You may also provide any additional information which you believe will be needed by or useful to the lead agency; attach additional pages as necessary to supplement any item.

### Part 1 - Project and Sponsor Information

1. Does the proposed action only involve the legislative adoption of a plan, local law, ordinance, administrative rule, or regulation? **See Attachment 1**
   - If Yes, attach a narrative description of the intent of the proposed action and the environmental resources that may be affected in the municipality and proceed to Part 2. If no, continue to question 2.
   - NO YES

2. Does the proposed action require a permit, approval or funding from any other governmental Agency?
   - If Yes, list agency(s) name and permit or approval:
   - NO YES

3. a. Total acreage of the site of the proposed action? ________ acres
   b. Total acreage to be physically disturbed? ________ acres
   c. Total acreage (project site and any contiguous properties) owned or controlled by the applicant or project sponsor? ________ acres

4. Check all land uses that occur on, adjoining and near the proposed action.
   - □ Urban □ Rural (non-agriculture) □ Industrial □ Commercial □ Residential (suburban)
   - □ Forest □ Agriculture □ Aquatic □ Other (specify): _________________________
   - □ Parkland
5. Is the proposed action,  
   a. A permitted use under the zoning regulations?  
   b. Consistent with the adopted comprehensive plan?  

6. Is the proposed action consistent with the predominant character of the existing built or natural landscape?  

7. Is the site of the proposed action located in, or does it adjoin, a state listed Critical Environmental Area?  
   If Yes, identify:  

8. a. Will the proposed action result in a substantial increase in traffic above present levels?  
   b. Are public transportation service(s) available at or near the site of the proposed action?  
   c. Are any pedestrian accommodations or bicycle routes available on or near site of the proposed action?  

9. Does the proposed action meet or exceed the state energy code requirements?  
   If the proposed action will exceed requirements, describe design features and technologies:  

10. Will the proposed action connect to an existing public/private water supply?  
   [If Yes, does the existing system have capacity to provide service?  
   □ NO □ YES]  
   If No, describe method for providing potable water:  

11. Will the proposed action connect to existing wastewater utilities?  
   [If Yes, does the existing system have capacity to provide service?  
   □ NO □ YES]  
   If No, describe method for providing wastewater treatment:  

12. a. Does the site contain a structure that is listed on either the State or National Register of Historic Places?  
   b. Is the proposed action located in an archeological sensitive area?  

13. a. Does any portion of the site of the proposed action, or lands adjoining the proposed action, contain wetlands or other waterbodies regulated by a federal, state or local agency?  
   b. Would the proposed action physically alter, or encroach into, any existing wetland or waterbody?  
   If Yes, identify the wetland or waterbody and extent of alterations in square feet or acres:  

14. Identify the typical habitat types that occur on, or are likely to be found on the project site. Check all that apply:  
   □ Shoreline □ Forest □ Agricultural/grasslands □ Early mid-successional  
   □ Wetland □ Urban □ Suburban  

15. Does the site of the proposed action contain any species of animal, or associated habitats, listed by the State or Federal government as threatened or endangered?  

16. Is the project site located in the 100 year flood plain?  

17. Will the proposed action create storm water discharge, either from point or non-point sources?  
   If Yes,  
   a. Will storm water discharges flow to adjacent properties?  
   □ NO □ YES  
   b. Will storm water discharges be directed to established conveyance systems (runoff and storm drains)?  
   If Yes, briefly describe:  
   □ NO □ YES
18. Does the proposed action include construction or other activities that result in the impoundment of water or other liquids (e.g. retention pond, waste lagoon, dam)?
If Yes, explain purpose and size: ____________________________________________________________
_______________________________________________________________________________________
_______________________________________________________________________________________

19. Has the site of the proposed action or an adjoining property been the location of an active or closed solid waste management facility?
If Yes, describe: _________________________________________________________________________
_______________________________________________________________________________________
_______________________________________________________________________________________

20. Has the site of the proposed action or an adjoining property been the subject of remediation (ongoing or completed) for hazardous waste?
If Yes, describe: _________________________________________________________________________
_______________________________________________________________________________________
_______________________________________________________________________________________

I AFFIRM THAT THE INFORMATION PROVIDED ABOVE IS TRUE AND ACCURATE TO THE BEST OF MY KNOWLEDGE
Applicant/sponsor name: Town of Dryden, Ray Burger  Date: ___________________________
Signature: _______________________________________________________

Part 2 - Impact Assessment. The Lead Agency is responsible for the completion of Part 2. Answer all of the following questions in Part 2 using the information contained in Part 1 and other materials submitted by the project sponsor or otherwise available to the reviewer. When answering the questions the reviewer should be guided by the concept “Have my responses been reasonable considering the scale and context of the proposed action?”

<table>
<thead>
<tr>
<th>Question</th>
<th>Moderate to large impact may occur</th>
<th>No, or small impact may occur</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Will the proposed action create a material conflict with an adopted land use plan or zoning regulations?</td>
<td>×</td>
<td></td>
</tr>
<tr>
<td>2. Will the proposed action result in a change in the use or intensity of use of land?</td>
<td>×</td>
<td></td>
</tr>
<tr>
<td>3. Will the proposed action impair the character or quality of the existing community?</td>
<td>×</td>
<td></td>
</tr>
<tr>
<td>4. Will the proposed action have an impact on the environmental characteristics that caused the establishment of a Critical Environmental Area (CEA)?</td>
<td>×</td>
<td></td>
</tr>
<tr>
<td>5. Will the proposed action result in an adverse change in the existing level of traffic or affect existing infrastructure for mass transit, biking or walkway?</td>
<td>×</td>
<td></td>
</tr>
<tr>
<td>6. Will the proposed action cause an increase in the use of energy and it fails to incorporate reasonably available energy conservation or renewable energy opportunities?</td>
<td>×</td>
<td></td>
</tr>
<tr>
<td>7. Will the proposed action impact existing: a. public / private water supplies?</td>
<td>×</td>
<td></td>
</tr>
<tr>
<td>b. public / private wastewater treatment utilities?</td>
<td>×</td>
<td></td>
</tr>
<tr>
<td>8. Will the proposed action impair the character or quality of important historic, archaeological, architectural or aesthetic resources?</td>
<td>×</td>
<td></td>
</tr>
<tr>
<td>9. Will the proposed action result in an adverse change to natural resources (e.g., wetlands, waterbodies, groundwater, air quality, flora and fauna)?</td>
<td>×</td>
<td></td>
</tr>
</tbody>
</table>
10. Will the proposed action result in an increase in the potential for erosion, flooding or drainage problems?  | No, or small impact may occur | Moderate to large impact may occur |

11. Will the proposed action create a hazard to environmental resources or human health?  | x                              |

Part 3 - Determination of significance. The Lead Agency is responsible for the completion of Part 3. For every question in Part 2 that was answered “moderate to large impact may occur”, or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

See Attachment A

---

☐ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.

☐ Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.

Dryden Town Board

Name of Lead Agency: Jason Leifer

Date: Town Supervisor

Print or Type Name of Responsible Officer in Lead Agency: Signature of Responsible Officer in Lead Agency

Signature of Preparer (if different from Responsible Officer)
The proposed changes intend to amend the Town of Dryden Zoning Law to change the standard in Section 706: Green Neighborhood Development, Additional Density to reflect the most current standard. The current law references the LEED 2009 standard and this is no longer the current standard. LEED standards are periodically updated and the law will function better if references follow the state of the art rather than remain static. The intent of Section 706 is to award additional density to projects that achieve a higher standard in green building and sustainable design. As standards evolve the Town statutes should reference the contemporary standards. The environmental impact of this change is to promote building projects that meet a higher standard of energy efficiency and sustainability.
The proposed changes amend the Town of Dryden Zoning Law to change the LEED standard in “Section 706: Green Neighborhood Development, Additional Density” to reflect the most current standard instead of the 2009 LEED standard. The employment of Section 706 awards additional density to projects that achieve a higher standard in green building and sustainable design. As standards evolve the Town statutes will now reference the contemporary standards.

This change promotes building projects that meet a higher standard of energy efficiency and sustainability and thus have a positive environmental impact. For this reason the amendments to Section 706 of the Zoning Law are not anticipated to have any significant adverse environmental impact.
