

Background:

[15.a]

The Villages of Freeville and Dryden have both opted to partner with the New York Power Authority to own their own streetlight infrastructure using LED lights to reduce energy use.

If I remember correctly, the Town Board indicated several months ago that we would like to pursue switching to LED for the 94? streetlights in the Town outside the Villages. I see from the update (below) from cooperative extension that NYPA is expected to announce a deadline for opting in very soon.
