RE: Energy Services Program
Authorization to Proceed with turn-key street light project
Town of Dryden – LED Street Lighting

Dear Supervisor Leifer,

The New York Power Authority (NYPA) is excited to support the Town of Dryden in identifying and implementing a comprehensive street lighting upgrade. Improving the existing street lights is a widely used and effective strategy to achieve the goal of reducing energy consumption, lowering utility costs, and improving light quality throughout the community.

Consistent with the Master Cost Recovery Agreement, NYPA provides a turn-key solution to upgrade the Town of Dryden's existing street lights to energy efficient LED technology. NYPA is pleased to offer these services to replace approximately 90 existing street light fixtures with new high efficient LED technology.

By signing below, the Town of Dryden authorizes NYPA to proceed with the full turn-key solution of the LED street lighting project, which includes the final design report, conduct bids for materials and installation labor, provide construction management, and commission the final project. When the design and bidding is completed, you will receive an Initial Customer Installation Commitment (ICIC) for your review and signature. At this point, if you choose to proceed to project implementation all development costs will be rolled into the overall project. Conversely, should you decide not to proceed with the implementation of the project, the Town of Dryden agrees to reimburse NYPA for all costs incurred up to the termination date for the development, design and bidding of the project. The cost of developing the design and for bidding the materials and labor will be determined during the next phase. NYPA will be fully transparent through this process and provide complete documentation as to how it determined all project costs.

By signing below, affirm that you agree to these conditions:
