

NYS Route 13/ 366 Corridor Management Plan

After reading through the NYS route 13/366 Corridor Management Plan, as well as taking into account the NYS DOT requirements for approved access along this state highway, we determined that it was in the best interest of the Towns Corridor Plan to share an existing curb cut with our neighboring property.

Based on our approvals already obtained through the New York State Department of Transportation, our current site plans reflect a permitted, shared access point that NYS 13 travelers are already familiar with.

In addition, because our access directly engages our development with the state highway, we did not feel that offering a sidewalk in front of our development was a safe addition to the development.
