Subject: development in Varna

I've recently been informed of a development in Varna which seems uncharacteristically dismissive of both the planning committees view of land use in the community and not in keeping with the character of the neighborhood, environment or transportation corridors. The high density planned is not consistent with the Town Comprehensive Plan for Hamlets and the Varna Amendment to the Comp Plan. The development will surely cause more congestion and potentially negative impacts on the 366 corridor and will possibly be unsafe near the intersection of Freese Road.

Thank you for considering my concerns.
