---

Town Board Members,

I have sent emails, spoken with both Ray Burger and Rick Young along with submitting this proposal to the DRYC.

The maps below show a portion of the land near the community garden that the town owns behind the town hall.

I am asking for support in developing this land as needed open grass fields in which the recreation department will have access to for programming needs.

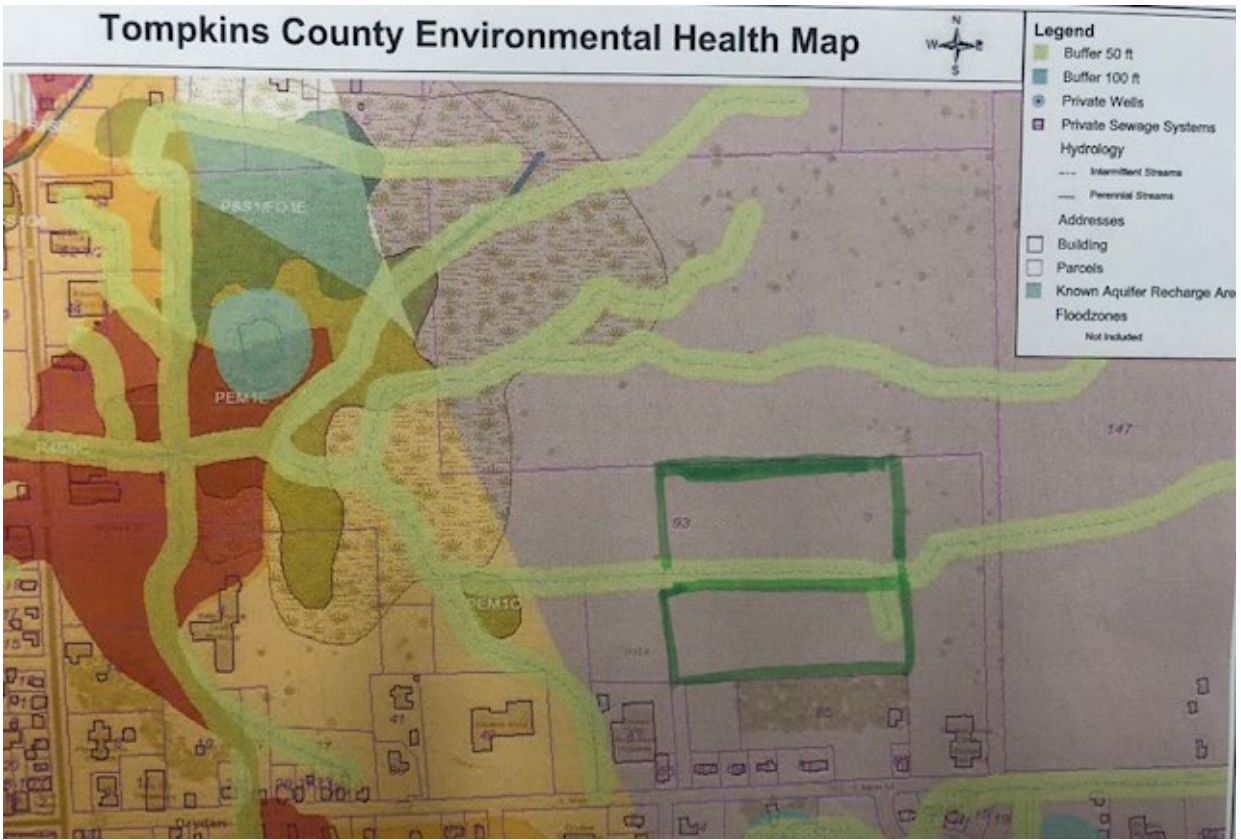

The proposed site is open space, relatively flat and well away from wetlands. The site could be developed and maintained by our highway department and the recreation department.

I look forward to working with everyone on this much needed project.

Thanks,  
Andrew
