Attachments: TSMI_17-07_PSAP_Details_102417.pdf

Good afternoon Adam,

Thanks for reaching out regarding a new crosswalk at this intersection. NYSDOT is in support of a properly located crosswalk with adequate sight distance in this area. We would be able to provide more guidance as to the best location once sight distance measurements are provided. I've also attached details from our Pedestrian Safety Action Plan, for our current signage & marking requirements.

Please reach out with any other questions or concerns. Stay safe & healthy!

Thanks,
Nadia

ATTENTION: This email came from an external source. Do not open attachments or click on links from unknown senders or unexpected emails.

Good morning Nadia,
The Town has asked that the project consider installing a crosswalk across Dryden Road at the location shown in the attached so to provide a crossing for individuals going between this project and/or the Monkey Run trail system and the Town of Dryden's Rail Trail System located up Mt. Pleasant Road.

Is this something the DOT would be in support of incorporating as part of this project, the future paving project of Dryden Road, or not support it at all? If you can let me know by say Friday morning (10/16) we will include your response in our submittal to the Town that day I would greatly appreciate it. Thank you!
