

This partition is for consideration by the town of Dryden's board vote to install a stop sign. Also I am told that there was a children "at play sign" that was removed coming up to this intersection. There are quite a few residents with younger children that wish the sign back.

We the undersigned who live on or near the corners of Sheldon and Wood Roads would like to partition the Town of Dryden for a stop sign. The sign to be placed on the northbound corner of this intersection. This would make it an all stop intersection. Because of the dip in this road, cars coming up the road traveling north are not seen till the last minute. This would also slow down cars that are most of the time going faster than the posted speed limit of 35mph. For these two reasons only we feel this would more than justify the extra sign for safety reasons alone.
