

My Solar Grid  
104 North Duane Ave.  
Endicott, NY 13760  
607 785-6499

Location of proposed project:

12 Forest Lane Ithaca, NY 14850 55.-1-4

This property is owned by Susan and William Ashdown.

Project:

Installation of a 4.8kW ground mounted solar array consisting of 10 4.8kW Q-cell panels with 1 Tesla inverter located at array and 2 Tesla Powerwall batteries located in a detached garage. The surface area of the array will be about 250 sq. ft., have an approximate footprint of 218 ft. with the highest point being about 12 ft. at the back of the array.

The planned location of the array on the property is approximately 50 ft. behind the house, about 100 ft. from the road. The neighboring property lines are located 35 ft. to the west and 45 ft. to the east. To complete this project we will need to trench about 100 ft. of ground in two sections, one running from the left rear corner of the detached garage to the right front corner of the array and from the left front corner of the array to the left rear corner of the house.

We typically trench about 6 inches wide and 18 inches deep.

Thank you,  
Kathleen Cooke
