TO: NYSERDA Clean Energy Communities Program
Albany, NY

Thank you for the award to the Town of Dryden for achieving Climate Smart Community Bronze Recertification under the Clean Energy Communities program.

We plan to use the awarded \$10,000 funds towards the cost of purchasing and installing a level 2, dual port EV charging station at the town DPW complex. We are fully committed to completing the project. We think it's going to help our DPW fleet reduce GHG emissions and become ready for the electrification of the town fleet.

If you have any questions, please don't hesitate to contact me.

Sincerely,

Jason Leifer
Town Supervisor
